As a mother, of two girls, I feel that I have a profound influence on them and what they do. I make sure to not litter because I don't wanted them to think it was ok to litter. I also joined my oldest daughter in donating blood this past year because the blood is given to people that need it to save there lives. That's why when a young man came to the door informing me that he was trying get a petition to put a plan in place to clean and protect Lake Ontario. I had to do my part to help. Lake Ontario has been a vacation spot for my family for many years. We have a camp at Breanne's beach . We enjoy fishing , swimming, boating and other activities that correspond with the lake. It shocked me a bit that a plan like plan B+ in which wild life mainly fish would be enhanced and there surrounding spawning areas would be better maintained would have to take the people to vote on to get put into place. I feel as a parent that anything done to protect the world in which are children grow up in and learn in should be protected at any cost.
